Kirti Dhingra

Enterprise Solutions Consulting | Product, Design and Developer Workflows, Security and AI

+61 447 235 701 | kirtidhingra@gmail.com | LinkedIn | Github | Australian citizen | Sydney

Product leader with 12 years at Google in Sydney and Singapore, in Product since late 2024 after 10 years in enterprise solutions architecture and pre-sales solutions consulting across AU/NZ and APAC. Partnered with Sales to lead technical discovery, product demonstrations and evaluations for Australia's largest enterprises including Woolworths, Coles, Wesfarmers, Kmart and Officeworks. Most recently ran Google's central identity and KYC platform, aligning Product, Engineering, legal and CISO security teams and using AI-assisted prototyping to pull platform migration ROI forward by 12 months. Began as a software engineer and holds an Engineering degree in IT and an MBA.

Core expertise in enterprise solutions consulting, product demonstrations and technical evaluations, bridging Product, Design and Engineering workflows, front-end HTML and AI prototyping, developer lifecycle, enterprise IT and CISO security alignment, and product roadmap influence.

Skills and Evidence

Enterprise Solutions Consulting, Product Demonstrations and Evaluations

- Led the AU/NZ Google Supply Chain Program across 90% of target enterprise retailers, defining evaluation success criteria, bringing 4M more products online, adding $80M in incremental revenue and featuring in $250M of joint business plans.
- Delivered $50M in new revenue growing Google's programmatic dynamic and app remarketing business across Southeast Asia against Criteo and Meta, leading technical pre-sales and direct integrations with Traveloka, Tokopedia, JD and Bukalapak.
- Managed a $200k partner co-funding program and annual contracts across AU/NZ, moving partner pitch rates from 40% to 80% and adding 3.6M incremental SKUs. Delivered a solution showcase to Feedonomics' C-suite and earned an endorsement from the CEO of Intelligent Reach after it built a Content API platform for Myer, Officeworks, Dan Murphy's and David Jones.
- Ran a Peak Season executive showcase and workshop for 170 customer and agency attendees (+70% year on year) that lifted solution awareness 37.5% on pre and post measurement and tied to $20M in revenue.
- Increased client investment by 50% by proving the ROI of Value-Based Bidding and feed integrations through three published case studies, then scaling the program from EMEA to APAC.

Bridging Product, Design and Developer Workflows with AI

- Accelerated time to ROI by 12 months on migrating Google's KYC review tooling to a modern task-based platform, using AI-assisted prototyping to generate UX variants and code-level specs that engineers tested in sandboxes. Replaced a 100% feature-parity requirement with a phased rollout, and cutting average review duration 45.8%, from 59 seconds to 32 seconds, in the Brazil pilot.
- Drove an 8.2x increase in merchant adoption of Google Shopping's AI-powered Sale Price Suggestions by designing and launching a proactive notification workflow across Merchant Center and email, scaling from 1% to 50% of merchants.
- Built an interactive front-end HTML matching-logic simulator with AI coding tools that exposed defects in an external vendor's V1 API before launch, letting engineering validate and approve V2 for production.
- Architected and delivered a Content API and regional pricing integration with Officeworks that cut developer data refresh latency from 24 hours to 15 minutes and grew SKUs 50%, incremental search revenue 10% and ROAS 15% in three months (case study).
- Won Google's internal AI Hackathon after building and sharing five-plus practical PM AI workflows across the org, and published open-source Python packages including MA(h)GIC (github.com/kirtidhi/MAhGIC), a multi-agent workflow pipeline with Claude, Gemini and OpenAI, and token-optimizer.

Enterprise IT, Security Governance and Product Roadmap Influence

- Owned and launched automated national ID verification for Google Cloud in India, the top-priority launch on the Google Payments Platform in 2026. Wrote the strategy memo and PRD for a decoupled architecture around strict three-minute data purge and data-localisation requirements, took 20+ stakeholders across CISO, legal, compliance, engineering and Cloud through security and launch review, lifted automated verification from 0% to 33%, cut manual reviews 75% and saved about $250k a year.
- Partnered with the Google Cloud CISO to align manual security review policies with automated platform standards, projected to cut operations handling time by 50%.

- Authored the PRD to move Ad Exchange (AdX) real-time bidding partner verification onto Google's central identity platform to strengthen account data controls, projected to cut operational effort by over 80% and save $137k a year.
- Authored the Singapore Payment Services Act options memo comparing three customer due diligence architectures across a government API, verifiable credentials and an aggregator, securing alignment on a Bring-Your-Own-Key hybrid design to prevent developer onboarding drop-off.
- Restructured Catch.com.au's marketplace architecture to one merchant account per seller after a major account suspension, isolating seller policy risk and supporting a $20.3M joint business plan (+62% year on year).

Scaling Technical Sales, Enablement Content and Voice of Customer

- Saved about 11 FTEs globally by designing and running vendorization programs for tag, feed and campaign integration work across APAC, EMEA and the Americas.
- Helped launch Regional Pricing and Availability in Australia by connecting customer engineering teams with Google Product through the beta, letting retailers advertise twice as many products and adding $10M in annual spend, with Kmart reporting $800k a month in incremental revenue.
- Built Project Magnet, an automated competitive insights tool comparing the top 50 Search, Video and Display advertisers, uncovering a $500k opportunity at REA Group and winning an internal automation award.
- Channelled customer requirements into the core product roadmap across APAC, shipping two new features in Google's Shopping offer-performance reporting tool, 11 bugs and feature requests in Dynamic ads, and the first two client implementations of Google's unified ad tag before public launch.
- Trained incoming technical specialists across AU/NZ, creating reusable customer workshops and technical enablement content including the Vodafone commerce workshop and the AU/NZ Commerce Hub build.

Experience

Google (2014 – 2026)

Product Manager, Payments Identity Platform Sydney, AU | 2025 – 2026
Central identity and KYC platform serving Cloud, Ads, Shopping and Play across regulated markets.

Product Manager, Google Shopping Sydney, AU | 2024 – 2025
AI-powered pricing insights and merchant notifications for Shopping advertisers.

Ad Solutions Architect Lead, Retail Sydney, AU | 2021 – 2024
Technical architecture and commerce growth strategy for AU/NZ's largest retail enterprises.

Ad Solutions Architect, Retail Sydney, AU | 2018 – 2021
AU/NZ technical lead, where AU/NZ reached the world's highest omnichannel ads penetration at 31%.

Senior Solutions Consultant, Display Advertising Singapore | 2014 – 2018
Regional pre-sales and technical specialist for dynamic integrations across Southeast Asia.

Yahoo! India (2011 – 2014)

Program Manager, Display Ads New Delhi, India | 2011 – 2014
Launched Yahoo! Smart Ads across India and Southeast Asia, delivering $20M in incremental revenue.

Capgemini Engineering, formerly Aricent (2005 – 2008)

Senior Software Engineer New Delhi and Dallas | 2005 – 2008
C on Linux/Solaris for SS7 signalling and Symbian OS telephony integration on TI OMAP.

Education and Awards

- MBA, UNSW Sydney, with exchange at Kellogg School of Management, Chicago
- Bachelor of Engineering in Information Technology (IT), Manipal Institute of Technology, Manipal, India
- Won Google's internal AI Hackathon and Hack-a-gTech 2015 for Lunch Ninja, later used by 50,000+ Alphabet employees.
- Won nearly 150 internal awards at Google across business impact, community impact and new product innovation.
